**M**indworks Study Skills Coaching gives your Middle School or High School student a highly skilled, objective professional to help them get organized, create an academic plan and learn valuable study skills required to be successful in school. With parental permission and support, the MLI Coach will communicate with teachers, check online grades and generally track student progress in order to provide specific and targeted training.

This highly individualized program consists of **18 hours of coaching delivered over a period of 9-12 weeks**. The MLI Coach comes to **the family home** and helps create a study space in which the student can be productive. **The schedule for the 9-12 weeks will be determined by the parents and MLI Coach**. Actual tutoring may or may not be part of the services rendered because it is a secondary focus. **The primary focus of the MLI Coach will be to assist the student in the creation of a place, plan and preparation for academic success.**

Call for more information (301-898-7222) and let this new and exciting program make the difference in the life of your student.
